DETAILED ACTION

1. Claims 1-10,13-26 and 28-57 are allowed.
2. The abstract of the disclosure is objected to because of the use of the legal phraseology of "means" and because of undue length, as it is approximately 174 words long. Correction is required. See MPEP § 608.01(b).

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

3. The drawing figures are objected to because they are sketches and because there is no description of number "82" in the specification. Provide the formal drawings in response to this Office action.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 11,12 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 11 and 12 are indefinite because in lines 3 and 4, there is no direct antecedent basis for the recitation of "said aircraft

engine". Claim 12 is further indefinite because it recites "a turbine" without any correlation to "a gas turbine engine" previously recited in claim 1. Claim 27 is indefinite because it recites "at least one heat generating sub-system" without any correlation to the identical recitation in claim 15.

6. Claims 11,12 and 27 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

7. The references listed on both the PTO-1449 and the PTO-892 show art of interest only, over which the claims recite allowable subject matter.

8. Applicants' response to this Office action should also include the updating of the status of the parent case by inclusion of the patent number in line 3 of para. [0001] of the specification.

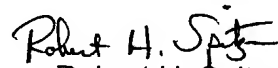

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert H. Spitzer whose telephone number is (571) 272-1167. The examiner can normally be reached on Monday-Thursday from (5:30AM-4:00PM).
